Description

In order to allow automatic dependency checking when building debian packaging, a debian package shipping a library should provide shlib or symbol file, but none is provided.

This prevent to easily build a package that as a dependency on librci, in the "debian way". dpkg-shlibdeps will fails
please consider reading :
  - man dpkg-shlibdeps
  - man deb-shlibs

Another solution, is to build package with debhelper. This file will automatically be created.
