Description

We should try to comply to the basic key points of the (substantial) Debian Policy Manual:

<http://www.debian.org/doc/debian-policy/>

There are lot of recommendations and requirements regarding the structure and contents of debian packages, eg.

- Package naming and versioning
- Content (licensing information, readme, changelog, ...)
- Required metadata (author, maintainer, ...)
- Description of contained libraries (shlibs file)
- and much, much more ...
