Packaging - Bug #1049
Package server key not valid and usage not publicly documented

06/29/2012 12:44 PM - Anonymous

Status:	Resolved		**Start date:**	06/29/2012
Priority:	Urgent		**Due date:**	
Assignee:	M. Goetting		**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:	rsb-0.7			

Description

The CoR-Lab package key https://support.cor-lab.org/attachments/download/202/package_server_key.txt as documented internally at https://support.cor-lab.org/projects/ciserver/wiki/RepositoryUsage doesn not work.
We should upload a new, valid key accessibly with a nice URL like
https://packages.cor-lab.org/CoR-Lab.asc for example.

Also we should have an entry page for the package server to document the usage of the key and the repository server.

- Priority changed from Normal to High

- Target version set to rsb-0.7

As I understand https://support.cor-lab.de/issues/373 this was fixed already. We just have to update the documentation.

- Status changed from Feedback to New

No warning anymore with the new key appliedvia apt-key. So issue is now no longer *fixing* the key but **documenting it**. If even CSE members are not able to find the proper key ...

Also I am still in favor of a download URI clearly linked to the package server (and maybe even easily memorable like the one suggested above).

#3 - 07/11/2012 04:35 PM - J. Wienke

Who is taking care of this now?

#4 - 07/11/2012 05:26 PM - Anonymous
