History

#1 - 07/01/2012 07:20 PM - J. Moringen

- % Done changed from 0 to 50

Initial SBCL setup is available on precise {32,64} bit slaves.

#2 - 07/10/2012 01:23 PM - Anonymous

scp'ing the packages to corpack with different distributions coded in the debian package names works fine to distribute it for several ubuntu versions.

Eg. as

- rsb-tools-ci0.7-0.7.0_lucid_i686.deb
- rsb-tools-ci0.7-0.7.0_onerics_i686.deb
- rsb-tools-ci0.7-0.7.0_precise_i686.deb
- ...

This could be a first solutions, that we can easily apply in the pkg job <https://ci.cor-lab.org/view/RSB/job/rsb-tools-ci-trunk/>

Future setup on corpack will be that target distribution is determined by the upload folder anyway, which makes it even easier.

#3 - 07/10/2012 01:45 PM - J. Moringen

I'm nevertheless preparing the precise slaves for building the rsbag stuff. May uncover some problems or something.
