

Robotics Systems Types - Bug #1150

ProvideFlexibleCPack not found by cmake

08/27/2012 09:48 AM - R. Haschke

Status:	Rejected	Start date:	08/27/2012
Priority:	Normal	Due date:	
Assignee:	R. Haschke	% Done:	100%
Category:	Build System	Estimated time:	0.00 hour
Target version:			

Description

When configuring cmake, I get the error:

```
include could not find load file:
  ProvideFlexibleCPack
```

Where should I get this?

History

#1 - 08/27/2012 09:51 AM - J. Wienke

- Subject changed from *cmake error* to *ProvideFlexibleCPack not found by cmake*

It should have found RSC before, which provides this macro. Can you please paste your complete CMake output?

#2 - 08/27/2012 11:49 AM - R. Haschke

- Category set to *Build System*
- Status changed from *New* to *Closed*
- Assignee set to *R. Haschke*
- % Done changed from *0* to *100*

I had two parallel versions of RSC installed and RST make used the older one...

#3 - 08/27/2012 12:02 PM - J. Wienke

- Status changed from *Closed* to *Rejected*
