<b>Description</b>			
Deployment of the java artifacts would ease the workflow dramatically for users who use maven in their projects. Also this feature requires only very small effort.			
<ul style="list-style-type: none"><li>- Add a pom to the project describing the artifacts and their dependencies</li><li>- Add one additional command execution to the release procedure, which deploys the artifacts along with the pom</li></ul>			
See <a href="http://maven.apache.org/plugins/maven-deploy-plugin/">http://maven.apache.org/plugins/maven-deploy-plugin/</a> for the respective maven deploy command.

Yes, this is done. I think there were multiple tickets for this, might be why this was missed.
