

Robotics Systems Types - Bug #1218

There is no Debian package for rst-converters without humavips in its name

10/23/2012 11:33 PM - J. Moringen

Status:	Rejected	Start date:	10/23/2012
Priority:	Normal	Due date:	
Assignee:	J. Wienke	% Done:	0%
Category:	packaging	Estimated time:	0.00 hour
Target version:	rsb-0.9		
Description			
This is confusing since "humavips" is not explained in the description of the package.			
Is the "humavips" tag necessary?			

History

#1 - 10/23/2012 11:34 PM - J. Moringen

- Subject changed from *There is on Debian package without humavips in its name* to *There is no Debian package for rst-converters without humavips in its name*

#2 - 10/24/2012 10:16 AM - J. Wienke

The idea here was that this is a humavips-specific collection of converters, because e.g. we do not need RCI in humavips. Should we set up a job including all dependencies? E.g. I have no idea how to deal with that SURF stuff from CTU.

#3 - 11/02/2012 09:47 AM - J. Wienke

Just to summarize our discussions: We will create an additional default rst-converters job without any suffix. This job will contain all converters where dependencies can be met through debian packages (either ubuntu default or our own packages) and will create a debian package for this configuration.

#4 - 11/02/2012 09:53 AM - S. Wrede

Yep. I think that is what we agreed upon as a solution for the current state until the plugin system is effective.

#5 - 11/02/2012 09:55 AM - J. Wienke

Whoops, wrong issue,

#6 - 03/04/2013 10:22 AM - J. Wienke

Arne, didn't you plan to add another rst-converters package?

#7 - 05/22/2013 11:03 AM - J. Wienke

IS anyone still interested in this or should we just skip this until we have a working plugin system etc?

#8 - 05/22/2013 11:12 AM - J. Moringen

I don't know what the difference between the HUMAVIPS-specific package and the generic package is (from the description I would assume that different converters are enabled and built).

However, the general plan was generating multiple plugins (and multiple Debian packages?) in the rst-converters project, if I recall correctly. If that really is the case, we can probably reject this and just wait until the new solution is in place.

#9 - 05/22/2013 11:20 AM - J. Wienke

- Status changed from New to Rejected

Yes, humavips e.g. doesn't know anything about RCI.

However, the general plan was generating multiple plugins (and multiple Debian packages?) in the rst-converters project, if I recall correctly. If that really is the case, we can probably reject this and just wait until the new solution is in place.

That's what i thought. I will reject this. Reopen if necessary.
