Robotics Systems Types - Bug #1239
rst-proto can generate invalid XML in the generated build.xml file

11/17/2012 03:43 AM - J. Moringen

Status:	Resolved		**Start date:**	11/17/2012
Priority:	Low		**Due date:**	
Assignee:	J. Moringen		**% Done:**	100%
Category:	Build System		**Estimated time:**	0.00 hour
Target version:	rsb-0.9			

Description

When pathnames contain "&" characters, these end up in the generated build.xml file. In these cases, the file is invalid with respect to XML syntax. Entity references of the form & should be used.

This wouldn't normally be a problem, but our assignment of slaves based on label expressions produces workspace directories like /home/jenkins/workspace/rst-trunk-merge-simulator/label/32bit&&(ubuntu-previous-lts||ubuntu-lts)

Revision 909b0821 - 11/17/2012 04:10 AM - J. Moringen

Escape "&" characters properly when generating from java/build.xml.in

fixes #1239

Previously, pathnames containing "&" characters caused an invalid XML file to be generated from java/build.xml.in.

- java/CMakeLists.txt: replace & with & entity reference in
  variables which are used in java/build.xml.in
- java/build.xml.in: insert pre-escaped lines for specification of jar files
