Ant-generated Jar-file unusable for ADT projects

11/18/2012 04:23 PM - S. Wrede

Status:	Resolved	Start date:	11/18/2012
Priority:	Normal	Due date:	
Assignee:	J. Wienke	% Done:	100%
Category:	Java	Estimated time:	0.00 hour
Target version:	rsb-0.9		

Description

The ant-generated rsb.jar file was reported to not work in Eclipse-Android projects. Exporting the RSB classes manually via the Eclipse-Jar-Exporter, the file work seamlessly. This is probably related to the class-file format but needs further investigation.

Can someone check this again with the master version. We added some restrictions which class version to generate.

#2 - 12/18/2012 10:35 AM - S. Wrede

Still the same problem. Seems to require further investigation.

That said, my class files look like:

```
ubi-1-235-215:classes swrede$ file rsb/Scope.class
rsb/Scope.class: compiled Java class data, version 49.0 (Java 1.5)
```

#3 - 01/08/2013 10:08 PM - J. Wienke

Soufian, does this work now?

Soufian? Ping?

#5 - 01/17/2013 03:59 PM - S. Jebbara

The new generated jar file works for android. I consider this issue as solved
