Revision 9ab6dab8 - 04/25/2013 04:14 PM - J. Moringen

Support specifying node class in src/frontend/model-builder.lisp

refs #1316

- src/frontend/model-builder.lisp (define-make-node): allow specifying ignored keyword parameters; accept and process class keyword parameter  
(define-make-node :enum): added accepted but ignore parameter qname of type `name/absolute`  
(define-make-node :structure): likewise  
(define-make-node :package): likewise
- test/frontend/model-builder.lisp  
(mock-structure-subclass): new class; mock structure class for builder test  
(test model-builder-root::smoke): explicitly specify node classes in some cases; query constructed repository/package to minimally verify correctness
