Description			
<p>We now install package config files with the naming scheme NemoMathx.x.pc (so nemomath version encoded) to have different NemoMath version installable in parallel (see #1217).</p> <p>This seems to break compatibility for projects using the pkg-config mechanism, since pkg-config now expects a dependency to NemoMath0.3 rather than just NemoMath.</p>

Pkg-config file needs to remain just NemoMath.pc instead of NemoMath0.3.pc for compatibility reasons.
