

RSBag - Feature #1423

Allow timestamp adjustments for the remote-controlled replay strategy

02/19/2013 10:59 AM - J. Wienke

Status:	Resolved	Start date:	02/19/2013
Priority:	Normal	Due date:	
Assignee:	J. Moringen	% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	rsb-0.9		
Description			
<p>I need to receive the original send timestamp of an event replayed using rsbag. The documentation indicates that this is possible using the :adjustments argument:</p> <p>http://docs.cor-lab.de//rsbag-manual/trunk/html/bag-play.html#adjusting-timestamps-during-replay</p> <p>However, this seems to be unsupported by the remote-controlled strategy:</p> <pre>jwienke@augit:~/Desktop\$ /homes/jwienke/Desktop/bag-tools/master/bag-play -p none -r 'remote-controlled :uri "spread:/control" :adjustments ((:original_send (:copy :send)))' -c '/monitoring.*' -c '/runner/states/entry/' nao-explorative.tide spread: STYLE-WARNING: Undefined alien: "SSLv2_client_method" Invalid initialization argument: :ADJUSTMENTS in call for class #<STANDARD-CLASS RSBAG.RSB.REPLAY:REMOTE-CONTROLLED>. See also: The ANSI Standard, Section 7.1.2</pre> <p>Also tested with current trunk version.</p>

Not sure if this should be reimplemented using the generic transform mechanism. At least not now anyway.
