Compliant Control Architecture - Feature #1436
Enhance CCA component state 'PERSISTED' with storage path information

02/22/2013 12:56 PM - C. Emmerich

Status:	New		**Start date:**	02/22/2013

Target version:	cca0.5			

Description

For being able to instruct a CCA component *where* to be persisted when being persisted with the state change request 'PERSISTED', a respective mechanism is required. It would be useful to enhance that state change trigger 'PERSISTED' with an additional storage path information.

Equivalently, the 'LOADED' state change trigger could expose such information, i.e. *where* to load the component from.

History

#1 - 02/22/2013 12:56 PM - C. Emmerich

- Assignee set to Anonymous

#2 - 08/12/2013 02:18 PM - Anonymous

- Target version set to cca0.4

#3 - 09/12/2013 04:25 PM - Anonymous

- Target version changed from cca0.4 to cca0.5
