Description			
Delete all *-0.8 packages of rsx (rsc, rsb, rst, rst-converters, ...) from the package server. They are superseded by rsx0.9 and shouldn't be used by anyone.			
<i>(This is most probably just deleting all packages with version 0.8 in it, since I don't think, that there are 0.8 packages other then rsx on our package server.)</i>

I rendered a list of packages from our package repository with the commands:

```
reprepro -b /srv/packages/repositories/ubuntu listmatched precise 'libs*0.8*'
reprepro -b /srv/packages/repositories/ubuntu listmatched precise 'rs*0.8'
```

(and the same for lucid, quantal, ..., of course)

@Jan, Johannes: Delete them all?

There is also libgstreamer-plugins-rsb0.10-0.8 0.8.10-b51~precise, is this also a deprecated rsx0.8 artifact?

Since 0.8 has never been an "official" release, I think, we can just delete all packages, including the gstreamer plugins.

Doesn't matter anymore.
