Priority:	Immediate	Due date:	
Assignee:		% Done:	100%
Category:		Estimated time:	0.00 hour
Target version:	rsb-0.9		
Description			
<p>Starting with the 0.10 master, debian packages should be deployed to the testing repository. not the stable one. This change in the jobs needs to be done before changing the version to ensure that no 0.10 packages ends up instable accidentally.</p> <p>Also modify http://packages.cor-lab.org to point to the testing repository.</p>

Do we now have 0.10 versions in the stable repository? If so we should remove them as soon as possible.
