

Robotics Systems Commons - Enhancement #1621

Deprecate and later remove Registry

Description			
<p>I would propose to now deprecate rsc::misc::Registry and later remove it completely. The rationale is that it basically performs the job of the factory classes available in the project apart from the pre-main registration, which was always hard to handle and the plugin system might be a better candidate now. Moreover we don't use it in production anymore. This would probably be a solution to #234.</p> <p>Any opinions on this?</p>

I never used this so I don't have any strong opinions, but I'm not against removing it.
