Please review the types in sandbox rst.tracking and propose changes to these types instead.

We would keep this in the queue as a proposal.

Any updates?

**#7 - 01/06/2015 06:16 PM - L. Ziegler**

This actually has nothing to do with Posture3DFloat or any other type in sandbox rst.tracking. This is meant to be a 6D Pose in 3D space with tracking information (also usable as cs transformation). Posture3DFloat is a set of 3D positions (translations) describing an articulated thing.

**#8 - 01/07/2015 04:43 PM - J. Moringen**

- Subject changed from *Proposal for a revision of Posture3DFloat to Add TrackedPose to sandbox*
- Status changed from *New to Feedback*

Sorry for the confusion. If the type is still needed, to which RST version should it be added? Still 0.10?

**#9 - 01/07/2015 05:22 PM - L. Ziegler**

I am currently not in urgent need of this type, but it seems to be a useful type in general. So I don't mind if it is added to the current development branch.

**#10 - 01/07/2015 06:19 PM - L. Ziegler**

- Status changed from *Feedback to Resolved*
- % Done changed from *0 to 100*

Applied in changeset commit:rst-protoljedad89bf4302a6c736401fe793bb4d388170e9a5.
