<b>Target version:</b>	rsb-0.11		

#### Description

It seems that rst trunk doesn't build with Java 6, but needs Java 7, see attached screenshot. So in source:java/CMakeLists.txt we should also check for the Java version and only build rst java when the version is suitable.

#### History

##### #1 - 06/25/2014 12:42 AM - J. Wienke

It works with java 6 without problem. I suspect an upstream bug where javac is a broken alternative after a default installation of ubuntu. Can you confirm this on your system? Also, switch to jdk 6 again with the alternatives to see what really happens in that case.

##### #2 - 01/07/2015 07:06 PM - J. Moringen

- Status changed from New to Rejected

Reopen if this is still an issue.
