

RSB SCXML Engine - Bug #1941

Remove CSRA-specific Functionality out of Engine Core

08/19/2014 06:46 PM - S. Wrede

Status:	Resolved	Start date:	08/19/2014
Priority:	Immediate	Due date:	
Assignee:	S. Wrede	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			

Description

```
aListener.addHandler(new Handler() {
    @Override
    public void internalNotify(Event event) {
        log.info("Got " + event.getData().getClass() + " Event");

        // hack to only register _active_ situation updates
        if (event.getData().getClass() == rst.classification.SituationType.Situation.class) {
            List<SituationType.Situation.AspectClassification> aspects = ((rst.classification.SituationType.Situation)
event.getData()).getAspectsList();

            if (!aspects.isEmpty()) {
                for (SituationType.Situation.AspectClassification aspectClassification : aspects) {
                    if (aspectClassification.getAspectName().equalsIgnoreCase("Activity_Corridor")) {
                        if (aspectClassification.getState().getDecidedClass().toStringUtf8().equalsIgnoreCase("active")) {
                            log.info("Activity_Corridor is found to be active, forwarding!");
                            triggerRSBEventInSCXML(exec, event);
                        }
                    }
                }
            }
        }
    }
});
```

We need to find a different concept to cope with these specific conditions.

History

#1 - 08/22/2014 04:15 PM - J. Wienke

- Status changed from New to Resolved

I think I removed everything that was specific on the way to other tickets ;)
