

Automated Build Generator - Bug #1991

Rsbam project causes generator to hang

09/12/2014 11:17 AM - S. Meyer zu Borgsen

Status:	Resolved	Start date:	09/12/2014
Priority:	Normal	Due date:	
Assignee:	J. Moringen	% Done:	100%
Category:	Project Analysis	Estimated time:	0.00 hour
Target version:	0.3		
Description			
The analysis of the rsbam.server project causes the job-generator to hang with full cpu utilization.			
Project: https://projects.cit-ec.uni-bielefeld.de/git/rsbam.server

Revision 943b0da0 - 09/12/2014 06:40 PM - J. Moringen

Support project.version property in src/analysis/maven.lisp

fixes #1991

Apparently, Maven provides a number of implicit properties such as project.version for use in e.g. dependency specifications. The analysis code now injects this property which it previously did not.

A second problem was a missing backport of the infinite recursion protection during property expansion.

- src/analysis/maven.lisp (analyze pathname eql :maven): inject "project.version" into user-supplied properties (%resolve-maven-value): added hack to detect and abort non-terminating replacements

Revision 72355b3a - 09/24/2014 08:02 PM - J. Moringen

Support project.version property in src/analysis/maven.lisp

fixes #1991
