

## Automated Build Generator - Bug #2044

### Aborted jobs(timeout) stop the buildflow.

10/07/2014 01:58 PM - S. Meyer zu Borgsen

<b>Description</b>			
If one job gets aborted the buildflow does not continue.			
<pre>                xqilla-2.3.0-toolkit-robocup-trusty-tahr-nightly #2 completed : ABORTED                 }</pre>

buildflow ignores aborted builds in src/commandline-interface/main.lisp

fixes #2044

- src/commandline-interface/main.lisp (configure-buildflow-job): ignore ABORTED and better instead of FAILURE and better

#### History

##### #1 - 10/07/2014 02:08 PM - J. Moringen

- Status changed from New to Feedback

I don't think we can control what happens in case of timeouts. The buildflow is already configured to continue in case of errors by default.

##### #2 - 10/07/2014 02:12 PM - S. Meyer zu Borgsen

If a timeout occurs for a job it gets the marked as ABORTED.

Failed jobs get the state FAILURE.

The problem is that it seems to only ignore the state FAILURE but not the state ABORTED.

This causes the whole buildflow to stop.

##### #3 - 10/07/2014 02:12 PM - J. Wienke

The documentation states:

|

| The flow will not take care of the triggered build status if it's better than the configured result. This allows you to ignore UNSTABLE < FAILURE < ABORTED.

So we could probably add an ignore(ABORTED).

**#4 - 10/07/2014 02:23 PM - J. Moringen**

| So we could probably add an ignore(ABORTED).

We would use ABORTED *instead of* FAILURE since the former "includes" the latter, right?

**#5 - 10/07/2014 02:29 PM - S. Meyer zu Borgsen**

Yes, that would solve the issue.

**#6 - 10/07/2014 02:34 PM - J. Moringen**

- Status changed from Feedback to Resolved
- % Done changed from 0 to 100

Applied in changeset commit:bf8c90b78b795ddbb398e6449ef757eef11849f9.

**#7 - 09/30/2016 10:47 AM - J. Moringen**
