RSB Java has protobuf version hard coded

Description

RSB Java has the protobuf version hard-coded to 2.4.1 in its pom.xml, where instead it should use a similar mechanism like rst, that detects the system version via cmake.

Currently that leads to errors on trusty when using rsb-java and rst-java, since rsb-java depends on protobuf 2.4.1 and rst-java depends on protobuf 2.5.0.
