#### Description

Spaces can cause errors in VDEMO\_components when defining a host for a component.

F.e. when a line is:

```
mss, ${PC_PUG}, -v pip=${NAO} -l -w 2 -g nao -L 1:
```

startup will fail while this is fine:

```
mss,${PC_PUG}, -v pip=${NAO} -l -w 2 -g nao -L 1:
```

I would be nice if spaces wouldn't matter here, especially because they don't matter in the latter part.
