I have slightly revised the patch. for formal issues and changed a few names of the enumeration to be better recognizable. Is it ok to rename "GAZE" to "AGENT", since it sound strange to me that an "intelligent apartment" (as in the type description) can actually gaze.

#6 - 01/06/2016 12:30 PM - P. Holthaus

I cannot find any differences between the patch I provided and the file you uploaded.

The type itself should imho not be apartment-specific, but as the description says for all kinds of "intelligent systems". We have explicitly designed it to use it as a common type shared with the Meka bot as well. Therefore, I would refrain from renaming the field.

I don't understand this argument. Isn't the mekabot some kind of agent?

#9 - 01/06/2016 12:39 PM - P. Holthaus

Yes, but an agent can use gaze and/or gesture, LEDs, beeps for example.

#10 - 01/06/2016 12:50 PM - Anonymous
