Revision b7126bd5 - 09/16/2016 04:28 PM - J. Wienke

Do not require absolute resource directories

FileResource now doesn't enforce absolute resource directories anymore.

These can be created on the fly from a relative one. Additionally, this also fixes the issue that absolute paths leaked to the RSB-reported parameters. This is achieved by distinguishing between the relative path to the file and the absolute location inside the resource directory.

fixes #2663
