

Automated Build Generator - Bug #2708

Invalidate analysis cache for new generator version

01/27/2017 05:45 PM - J. Moringen

Status:	Resolved	Start date:	01/27/2017
Priority:	Normal	Due date:	
Assignee:	J. Moringen	% Done:	100%
Category:	Project Analysis	Estimated time:	0.00 hour
Target version:	0.12		
Description			
The analysis cache should be invalidate or at least not used when it was written by a different generator version.

Revision 29df3ee7 - 02/23/2017 07:18 PM - J. Moringen

Versioned analysis cache in src/analysis/git.lisp

fixes #2708

This resolves the problem of changes in the generator's analysis code not going into effect because of cached results produced by old analysis code.

- src/analysis/variables.lisp: new file; contains variables used in the analysis module; currently only `*cache-version*`
- src/analysis/git.lisp (header): updated copyright
(analyze-git-branch/cached): compare stored cache version against current cache version and potentially discard stored data accordingly
(analyze-git-branch/cache): store data and cache version
- jenkins.project.asd (system jenkins.project): added file src/analysis/variables.lisp

History

#1 - 02/23/2017 11:23 AM - J. Moringen

- Status changed from New to In Progress
- Target version changed from 0.10 to 0.12
- % Done changed from 0 to 50

#2 - 02/23/2017 08:10 PM - J. Moringen

- Status changed from In Progress to Resolved
- % Done changed from 50 to 100

Applied in changeset commit:29df3ee76b2943f5f01ef318e0490baae4f78e7c.
