vdemo - Bug #2778
vdemo perturbed by bashrc print-outs

10/22/2018 10:46 AM - G. Walck

Status:	New		**Start date:**	10/22/2018
Priority:	Low		**Due date:**

Target version:				

Description

Seems like an

```
echo  "Hello World"
```

in the bashrc, perturbs vdemo start, it won't recognize the screen has started

```
gwalck@brutus:~$ vdemo_sfb.sh
resetting machine names to localhost
-- [2018-10-22T10:41:32] my process id: 8206, vdemo-id: vdemo-sfb-k0U5Bl5dgX
created spread config: /tmp/vdemo-sfb-k0U5Bl5dgX-spread.conf
connecting to localhost: ....error: 'Hello Worldconnected'
```

obvious solution is to remove this echo, but people might have some other bashrc "outputs"

is it something easy to fix at vdemo side ? No necessity nor urgency though

I cannot confirm this issue.

Which version / where did you tried?
