Robotics Service Bus - Tasks #372
Write Wiki Page about Component Specification

06/18/2011 03:18 PM - S. Wrede

Status:	Rejected		**Start date:**	06/18/2011
Priority:	Normal		**Due date:**	
Assignee:			**% Done:**	0%
Category:	Documentation		**Estimated time:**	0.00 hour
Target version:				

Description

We should consider a typical component such as the ISR for describing how the interface of such a component looks like. What are best practices for the structuring of an interface, how are Listeners and Informers linked to Scopes, ...

This is a mixture of prototyping ideas on paper (actually in the Wiki) for the model layer and may also contribute to documentation.

History

#1 - 03/31/2014 11:44 PM - J. Moringen

- Status changed from New to Rejected

Superseded by a combination of introspection, composite participants (see #44, [[Meetings2014-03-17]]) and project:rsb-dsl.
