Description

I could not get the initial import to work. No idea why.

History

#1 - 08/13/2011 12:27 PM - M. Goetting

- Status changed from New to Closed

- % Done changed from 0 to 100

Reinit (create) the repoitory again and remove username an pasword from the DB. Now it works.

During the setup processs for an new Redmine project you should only enter the name of the svn repo. No name and no password!!

After the creation of the project within the next 10 minutes the repository is created automatically.
