

Robotics Service Bus - Bug #731

Install Documentation for Binary Packages broken

11/24/2011 12:04 PM - S. Wrede

Status:	Rejected	Start date:	11/24/2011
Priority:	High	Due date:	
Assignee:	M. Goetting	% Done:	0%
Category:	Documentation	Estimated time:	0.00 hour
Target version:	0.6		

Description

```
swrede@ubuntu:~$ sudo apt-get install rsb-cpp
Reading package lists... Done
Building dependency tree
Reading state information... Done
E: Couldn't find package rsb-cpp
```

History

#1 - 11/24/2011 12:08 PM - S. Wrede

- Status changed from New to Feedback

This works using rsb0.6 as install command. However, I wonder how this package naming complies with our chosen naming convention for build jobs?!? See also: #669

#2 - 11/24/2011 12:10 PM - S. Wrede

Furthermore: Wasn't our idea to provide a meta-package such as "rsb" which then refers to the last stable version. Apart from this, I would anyway suggest this kind of meta-package that would install the whole rsb stack with all of the tools in a certain version. (similar to Ubuntu-Desktop)

#3 - 02/27/2012 03:03 PM - J. Wienke

- Status changed from Feedback to Rejected

Package naming has changed since this has been reported. Reopen if the problem persists.
