Description

We should install license files with our packages to simplify later packaging.

Several conventions exist:

- https://wiki.archlinux.org/index.php/Arch_Packaging_Standards#Licenses
- <https://fedoraproject.org/wiki/Packaging/LicensingGuidelines>
- ubuntu seems to use /usr/share/doc/\$package/copyright

I would propose to simply use one of these conventions and package maintainers for other packages need to create symlinks.

Revision 5428c8fe - 05/07/2012 05:37 PM - J. Wienke

Install license using ubuntu standard. Packagers of other distros can adapt in their packaging rules.
