

Benchmarking Environment - Tasks #895

Unit support

02/22/2012 06:29 PM - Anonymous

Status:	Feedback	Start date:	02/22/2012
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:			
Description			
How do we want to handle units? E.g. some of the measures are in seconds, others in microseconds or dimension-less (e.g. ops per second).			

Associated revisions

Revision 12 - 02/22/2012 06:30 PM - anordman

Added units to command-line output (pretty hard-coded yet)
refs #895

History

#1 - 06/20/2012 01:18 PM - M. Rolf

More units come from callgrind: #cpu-cycles!
And potentially many, many more, like memory-footprint, cache-misses, ...

We clearly need an abstraction for all this stuff! And it should define some ordering, like 'smaller=better' or 'bigger=better'.
