## **Robotics Service Bus**

	2021-9				2021-10				2021-11					2021-12					2022-1				2022-2		
	36		38	39	40	41	42	43	44	45	46	47	48	49	50	51	52	1	2	3	4	5	6	7	8
Robotics Service Bus	Ro	botics	Ser	vice	Bus																				
Add Conditional Parsing for User Data in ()																									
State model/checking for modifications on ()																									
Unify exception handling																									
Specify barricade strategy for passed arguments																									
Support QoS in Spread connector																									
Generate and export API Documentation																									
Timestamp compatibilty to ROS and YARP																									
Use RST IDL Type for Protocol Buffer Tutorials																									
Test / Reconsider Distributed Logging																									
Check usage and reduce number of dynamic ()																									
Consider introduction of lock-free queues																									
Hierarchical Event Fusion																									
Ideas for Recording Data on a Resource-Constrained	()																								
rsb-java does not shutdown properly if a ()																									
Create an in process example																									
Allow regex-based converter selection for ()																									
Move Figures to Top-Level Folder																									
Improve documentation for debian package ()																									
VERSION_SUFFIX should be configurable																									
Socket transport in Python silently drops ()																									
Matlab Installation Doc																									
Better handling of dependencies without pc ()																									
rsb matlab interface not fully working with ()																									
Encode version in library name																									
pkg-config test fails in integration test																									
Support common installations (to simlify ()																									
Allow (optional) parallel method calls																									

04/25/2024

added WireSchemaFilter + FilterCombination Compilation of RSB Tools fails on MacOS 10.10 Setters for TimesyncStrategy options Uniformed path for System-Config in Windows Robotics Service Bus - rsb-0.18

Introspectable Configuration Options (...)
