<b>Robotics Service Bus - rsb-0.18</b>	<b>Robotics Service Bus -rsb-0.18 30%</b>																									
Which timestamps should be set (...)	In Progress 30%																									
Newer tool versions should be able (...)	In Progress 50%																									
Computation of channel format is (...)	New 0%																									
Extend Elan backend	In Progress 20%																									
Support proper temporal intervals (...)	New 0%																									
Support linked media files (...)	In Progress 40%																									
Allow limiting recording time	New 0%																									
bag record: Make status output (...)	In Progress 50%																									
Minimal support for ROSbag file (...)	In Progress 60%																									
Support explicit backend selection	New 0%																									
Store start and end timestamp of (...)	New 0%																									
bag record: Start timestamp for (...)	New 0%																									
Allow to deduplicate participants (...)	New 0%																									
Bag as bus server crashes in case (...)	New 0%																									
Events with same timestamps are (...)	In Progress 20%																									
Flush indices based on combined (...)	New 0%																									
show-progress online help doesn't (...)	New 0%																									
Allow to specify output stream (...)	New 0%																									
<b>Robotics Service Bus - rsb-1.0</b>	<b>Robotics Service Bus -rsb-1.0 16%</b>																									
Verify Elan backend	New 0%																									
Use data type definitions stored (...)	In Progress 30%																									
Rename bag-merge -> bag-transform	In Progress 60%																									
Support C++ as a client language	In Progress 50%																									
Support Java as a client language	New 0%																									
Document C++ client API	New 0%																									

<b>Document Java client API</b>	<b>New 0%</b>
<b>Add TYPE block to TIDELog backend</b>	<b>In Progress 20%</b>
<b>Add META block to TIDELog backend</b>	<b>In Progress 20%</b>
