<b>Robotics Service Bus</b>	<b>Robotics Service Bus</b>																												
<b>RSBag</b>	<b>RSBag</b>																												
<b>Robotics Service Bus - rsb-0.18</b>	<b>Robotics Service Bus -rsb-0.18 30%</b>																												
Which timestamps should be set (...)	In Progress 30%																												
Newer tool versions should be able (...)	In Progress 50%																												
Computation of channel format is (...)	New 0%																												
Extend Elan backend	In Progress 20%																												
Support proper temporal intervals (...)	New 0%																												
Support linked media files (...)	In Progress 40%																												
Allow limiting recording time	New 0%																												
bag record: Make status output (...)	In Progress 50%																												
Minimal support for ROSbag file (...)	In Progress 60%																												
Support explicit backend selection	New 0%																												
Store start and end timestamp of (...)	New 0%																												
bag record: Start timestamp for (...)	New 0%																												
Allow to deduplicate participants (...)	New 0%																												
Bag as bus server crashes in case (...)	New 0%																												
Events with same timestamps are (...)	In Progress 20%																												
Flush indices based on combined (...)	New 0%																												
show-progress online help doesn't (...)	New 0%																												
Allow to specify output stream (...)	New 0%																												
<b>Robotics Service Bus - rsb-1.0</b>	<b>Robotics Service Bus -rsb-1.0 16%</b>																												
Verify Elan backend	New 0%																												
Use data type definitions stored (...)	In Progress 30%																												
Rename bag-merge -> bag-transform	In Progress 60%																												
Support C++ as a client language	In Progress 50%																												
Support Java as a client language	New 0%																												
Document C++ client API	New 0%																												

<b>Document Java client API</b>	<b>New 0%</b>
<b>Add TYPE block to TIDELog backend</b>	<b>In Progress 20%</b>
<b>Add META block to TIDELog backend</b>	<b>In Progress 20%</b>
